Standard Configuration **Price \$24,990**

Enclosure

The entire vehicle is engineered with a full aluminum frame and casing, featuring integrated welding for exceptional strength, durability, and a lightweight structure.

The vehicle body features an XPS flame-retardant insulation board in the middle layer.

The inner layer of the vehicle body uses eco-friendly interior panels.

The pop-up tent features waterproof and UV-resistant soft curtain fabric combined with insulation cotton.

The windows are made of double-layer acrylic and come with mosquito screens and two privacy curtains.

RV-specific entry door (double-layer with a screen door).

Interior

The overhead bed features a 2m x 1.65m pull-out design (customized size based on the vehicle model).

Opposing dinette seats with a swivel table in the middle (convertible into a bed).

The mattress and cushions are made of 50D high-density foam.

The cabinet material is RV-specific Soundda lightweight eco-friendly board (with UV anti-counterfeit feature)

Appliances

Reserved battery space and wiring, with the option to supply two 12V 100Ah lithium batteries (extra charge of \$495 per battery).
